Senior Consultant with 10+ years of software design experience. *I am a highly motivated and detail-oriented software engineer seeking to use my expertise in software development to provide innovative solutions and outstanding customer service.*

Highlights

- Architected and developed an enterprise SaaS React solution supporting 100+ clients.
- Led development of mission-critical PEBT website, architecting a responsive Angular 15 solution with NgRx state management that served 20K families.
- Established an Angular mentorship curriculum and code review process, guiding 4 interns to successfully deliver production features during their fall internships.
- Led front-end development of enterprise product license management platform integrating Azure AD B2C authentication, delivering both internal administration portal and customer-facing product key interface.

Soft Competencies

- Effective communication, collaborating with cross-functional teams and stakeholders to translate requirements into technical solutions.
- Strong problem-solving skills with the ability to debug, optimize, and improve code for better performance and maintainability.
- Adaptable and quick learner, capable of picking up new technologies, frameworks, and tools as needed to meet project demands.
- Detail-oriented, ensuring code quality through thorough documentation, peer code reviews, and adherence to best practices.
- Time management and prioritization, efficiently balancing multiple projects, deadlines, and competing priorities.

Technical Competencies

- **ReactJs:** Demonstrated expertise in establishing React best practices, component libraries, and development patterns that accelerate team velocity while maintaining code quality and consistency.

- **Angular:** Comprehensive mastery of Angular development including TypeScript, NgRx Component Store state management, Angular Material, and build optimization, consistently delivering robust solutions that scale.
- **JavaScript:** Proficient in modern JavaScript (ES6+) with a focus on writing clean, performant, and reusable code in front-end applications.
- **Responsive Web Design:** Skilled in responsive web design, leveraging CSS Grid, Flexbox, media queries, and modern frameworks like Tailwind to create adaptive, mobile-first layouts that provide an optimal user experience across all devices.
- **.NET:** Proficient in .NET development with a strong focus on RESTful API design, dependency injection, and database integration.
- **Azure:** Experienced in Azure, utilizing App Services for deploying and managing scalable web applications, and setting up CI/CD pipelines with Azure DevOps for automated builds, testing, and deployments.

Experience

2015 – PRESENT

Senior Consultant | Moser Consulting | Indianapolis, Indiana

- **Benesys**

Led the front-end development of a new benefits portal for trade workers.

Architected a scalable enterprise React solution.

Implemented a React front-end utilizing Zustand, Tanstack Query, and React Hook Form.

Implemented responsive web design utilizing Tailwind.

Worked with the Prime React component library for rapid development.

Onboarded client developers and provided a smooth transition that allowed them to quickly integrate into the project.

Coordinated with stakeholders and technical staff to plan, design, implement, deploy and maintain technical solutions.

- **Family and Social Services Administration**

Led the front-end development of a new summer PEBT website.

Implemented a responsive Angular 15 front-end utilizing TypeScript.

Ensured the team followed best practices under tight timeline.

Responsible for implementing designs from the design team.

Successfully implemented state management using NgRx Component store.

- **Schwarz Partners**

Led the front-end development for a product key management system.

Implemented a responsive Angular 14 front-end utilizing TypeScript.

Developed an internal user administration application built on Azure ADB2C.

Developed an external application for managing product keys.

Implemented back-end API's utilizing .NET & C#.

Implemented and maintained SQL Server tables and stored procedures.

Led the team in developing best practices for documentation using Compodoc.

- **Venture Logistics**

Developed an internal Angular web application for trucking logistics management.

Implemented a responsive Angular 13 front-end utilizing TypeScript.

Implemented back-end API's utilizing .NET & C#.

Implemented real time user tracking using SignalR.

- **Anthem**

Modernized VB .NET service by upgrading to .NET Core 2.2.

Ensured .NET services complied with security requirements.

- **Intern Mentor**

Mentored multiple interns on Angular development.

Created learning plans and practice projects to ensure continued growth.

Provided feedback and guidance on practice and client projects to ensure high-quality deliverables.

2012 – 2015

Application Solutions Developer | Department of Local Government Finance | Indianapolis, Indiana

Analyzed and designed application requirements.

Developed web solutions to automate taxpayer inquiries regarding property taxes using dynamic SQL and ASP .NET.

Developed windows form solutions to automate transfer of data from excel to SQL Server.

Implemented complex business logic to calculate counties circuit breaker loss.

Responsible for testing, implementation, analysis and fixing of bugs.

Assisted users and maintained user accounts.

Education

2007 - 2012

BS Computer Science | IUPUI | Indianapolis, IN
